

DEAL WITNESS

**The deal closes
Friday.**

**And you just lost
your star performer.**

You need active institutional memory.

The records survived.

The reasoning path did not.

9 months

of evidence

14 organizations

across the deal

36 people

and synthetic roles

Maya knew whom to call—and why.

Deal Witness preserves her evidence paths. It does not replace her judgment.

The evidence river becomes a map.

430 stored records replay into 13 navigable clusters.

Money

facility · pricing · liquidity

Promises

construction · reporting · controls

Risks

delivery · permits · continuity

Decisions

credit · scope · escalation

288 items

864 source links

144 contract-scoped

Not more nodes—better-supported
knowledge.

A gap becomes a source-backed answer.

01

Expose the gap

Show the receipts that made it visible.

02

Find the right expert

Rank capability—and explain why.

03

Capture a sourced answer

Store attribution, receipts + recipe.

Vague stays open.

Evidence closes the gap.

Maya remains historical provenance—not a contact.

INPUTS

decision-bearing records

DECISIONS

what the team chose

RISKS

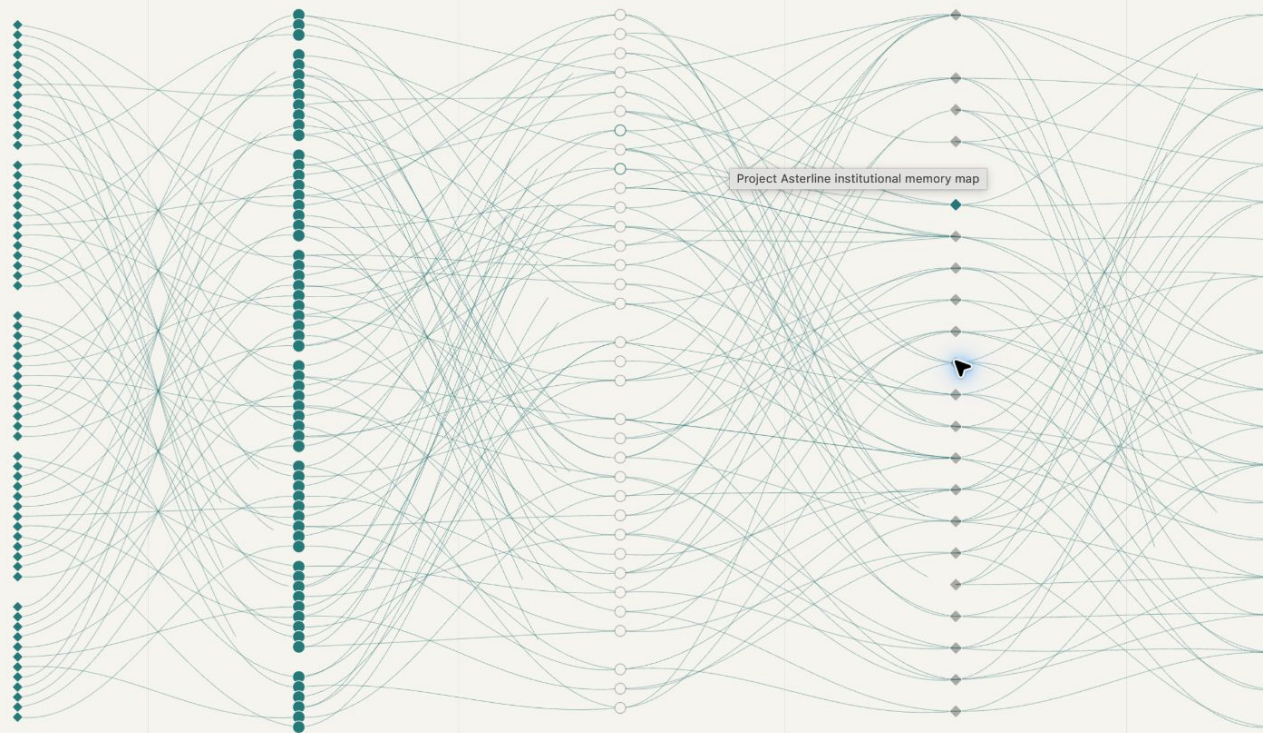

what choice exposed

PROMISES

negotiated mitigations

MONEY

funding consequences

\$380M financing

Nine months of deal history must still work without Maya.

384 source records represented

288 atomic items

64 of 72 decisions mapped

13 stable clusters

24 investigation paths

SELECTED RECEIPT

Model note · record 64

A historical decision remains connected to the risks, promises, and monetary consequences it changed.
